## Frontend Developer | React.js | Vue.js | JavaScript | TypeScript | Next.js | Redux | Tailwind CSS | Bootstrap CSS

Creative Frontend Developer with **5 years** of experience in designing, developing, and refining modern web applications. Adept at creating responsive, user-centric interfaces using **HTML5, React.js, Vue.js, CSS3, SASS, JavaScript, and TypeScript**. Strong grasp of component-based architecture, modern state management, performance optimization, and Agile methodologies. Experienced in end-to-end **SDLC**, from design to deployment, with a strong focus on clean, maintainable code and user experience.

## HIGHLIGHTS

- Built responsive, accessible, and cross-browser compatible interfaces using **React.js, Vue.js, HTML5, and CSS3**.
- Integrated RESTful APIs and third-party services with modern frontend frameworks.
- Utilized **Next.js** and **React Router** for dynamic routing and **SSR** (server-side rendering).
- Strong experience with **Tailwind CSS, Bootstrap, and Material UI** for fast UI development.
- Wrote unit tests with **Jest, React Testing Library** and **Vue Testing Library** to ensure code reliability.
- Implemented global state management using **Redux, Redux Toolkit, and Vuex**.
- Optimized frontend performance through lazy loading, code splitting, and caching strategies.
- Worked in **Agile/Scrum** teams and used tools such as **Git** and **GitLab** for version control.

## PROFESSIONAL EXPERIENCE

---

### Lead Frontend Developer

Innovature Software Labs Pvt Ltd, Cochin, India

Aug 2022 – Apr 2025

#### Project 1: PCP Kitchen Management System

**Technologies:** *Vue.js, Chart.js, PHP Laravel, AWS S3, MySQL, Tailwind CSS*

- Developed a dynamic dashboard interface to check food preparation workflows.
- Used **Chart.js** to create interactive data visualizations for inventory and prep status.
- Integrated secure file handling and storage with **AWS S3**.
- Collaborated with backend team to integrate APIs and optimized performance.

#### Project 2: Attendance Management System

**Technologies:** *Vue.js, PHP Laravel, AWS S3, MySQL, Tailwind CSS*

- Built responsive UI screens for managing employee attendance and leave tracking.
- Developed a dynamic dashboard interface to check attendance/leaves of employees.
- Improved usability by creating reusable components and forms with validation.
- Applied advanced debugging and performance profiling techniques.

#### Project 3: TaskWhiz

**Technologies:** *React.js, Next.js, MySQL, Bootstrap CSS*

- Built a web application to promote internal collaboration by enabling employees to contribute their skills to organizational tasks.
- Designed intuitive interfaces for task assignment and submission tracking using **React.js** and **Next.js**.
- Integrated performance evaluation, where completed tasks are reviewed and rewarded to motivate employees.

#### Project 4: Waste Classify

**Technologies:** *React.js, Python, Google Vision API, Google Search, AWS S3, MySQL*

- Designed a React-based UI for image classification using **Google Vision API**.
- Managed API data processing and dynamic search rendering with async calls.
- Implemented secure media handling using **AWS S3** buckets.

#### Project 5: Hokushin

**Technologies:** *React.js, Python, LINE App API, MySQL, Bootstrap CSS*

- Built a user-friendly chat interface and integrated LINE App API for seamless messaging functionalities.
- Collaborated on designing user journeys and modular structure in React.
- Ensured mobile responsiveness and accessibility across all screen sizes.

## Frontend Developer

iGenZ Technologies Pvt Ltd, Bangalore, India

Oct 2020 – Jul 2022

### Project 1: CareerZopt

**Technologies:** *React.js, Node.js, Bootstrap CSS*

- Built and supported scalable **React.js** components with reusable logic and hooks.
- Used **React Router** for dynamic routing and lazy loading.
- Integrated backend APIs and implemented responsive layouts using **Tailwind CSS**.
- Participated in daily stand-ups, code reviews, and feature planning sessions.

### Project 2: Restaurant Management System

**Technologies:** *React.js, Node.js, MongoDB, Bootstrap CSS*

- Developed an application to streamline restaurant operations, including table reservations, order processing, inventory tracking, and customer engagement.
- Built interactive UI components using **React.js** for real-time order updates and reservation management.
- Implemented **RESTful APIs** with **Node.js** for efficient communication between frontend and backend services.
- Utilized **MongoDB** for flexible and scalable data storage, managing customer profiles, menus, orders, and inventory records.
- Improved operational efficiency and enhanced customer experience through automation and centralized management tools.

## SKILLS

---

### Languages

- HTML5
- CSS3
- SCSS
- JavaScript (ES6+)
- TypeScript

### Frameworks & Libraries

- React.js + Vite
- Next.js
- Vue.js + Vite
- Bootstrap CSS
- Tailwind CSS

### UI/UX Tools

- Figma

### Version Control System

- GitLab
- GitHub

### Test case

- Jest, React Testing Library
- Vi-Test, Vue Testing Library

### State Management

- Redux Toolkit
- Vuex

## EDUCATION

---

APJ Abdul Kalam Technological University

Bachelor of Technology in Computer Science & Engineering

2016 to 2020
