PROFESSIONAL SUMMARY

Frontend Developer with 5+ years of experience designing and shipping scalable, high-performance web applications using React.js, Next.js, Vue.js, JavaScript, and TypeScript. Proven record of improving application performance, API throughput, and user engagement through component-driven architecture, state management (Redux, Vuex), and rendering optimisation. Delivered production features across SaaS dashboards, real-time messaging, and AI-powered platforms while collaborating cross-functionally in Agile teams. Strong track record of translating complex workflows into measurable performance and usability gains.

KEY ACHIEVEMENTS

- Improved frontend-backend data flow performance by 25% by architecting and consuming REST APIs for a real-time Vue.js operational dashboard.
- Increased employee management efficiency by 15% and boosted application performance by 10% through dynamic dashboards, reusable components, and performance profiling.
- Delivered a 12% efficiency gain on a React/Next.js collaboration platform via component-based architecture and state management optimisation.
- Cut booking-flow load times and increased performance by 20% on a real-time reservation system using lazy loading, code splitting, and memoization.
- Boosted frontend performance by 10% on an AI-powered classification platform through lazy loading, code splitting, and optimized state management.

PROFESSIONAL EXPERIENCE

Lead Frontend Developer

Aug 2022 – Apr 2025

Innovature Software Labs Pvt Ltd — Kochi, India

PCP Kitchen Management System | Vue.js, Chart.js, Tailwind CSS

- Architected a real-time operational dashboard in Vue.js to monitor end-to-end kitchen workflows and staff activity.
- Built interactive Chart.js visualizations for live inventory levels and preparation status tracking.
- Engineered secure AWS S3 file upload and storage workflows, ensuring privacy-compliant document and media handling.
- Partnered with backend engineers to design and consume REST APIs, improving data flow and frontend performance by 25%.

Attendance Management System | Vue.js, Tailwind CSS

- Designed responsive UI screens for employee attendance and leave tracking, adopted org-wide.
- Built a dynamic attendance/leave dashboard that increased employee management efficiency by 15%.
- Increased usability by developing reusable, validated form components.
- Applied advanced debugging and performance profiling to drive a 10% performance improvement.

TaskWhiz | React.js, Next.js, Tailwind CSS

- Built a collaboration platform enabling employees to contribute skills to organisational tasks.
- Implemented component-based UI architecture in React and Next.js for scalability and maintainability.
- Engineered task assignment and submission-tracking interfaces with dynamic state management, reducing page load time.
- Led performance evaluation and optimisation initiatives, achieving a 12% efficiency improvement.

Waste Classify | React.js, Material UI, Bootstrap CSS

- Built a React interface for AI-powered waste classification using the Google Vision API.
- Implemented asynchronous API calls and dynamic search rendering for classification results.
- Designed secure, privacy-compliant media upload and storage workflows using AWS S3.
- Improved frontend performance by 10% via lazy loading, code splitting, and memoization.

Hokushin | *React.js, Material UI*

- Built a real-time messaging interface integrated with the LINE Messaging API.
- Developed modular, scalable React components to improve performance and maintainability.
- Designed intuitive messaging user journeys in collaboration with product and backend teams.
- Ensured full mobile responsiveness and accessibility across devices and screen sizes.

Frontend Developer

Oct 2020 – Jul 2022

iGenZ Technologies Pvt Ltd — Bengaluru, India

CareerZopt | *React.js, Bootstrap CSS*

- Implemented client-side routing with React Router; optimised load times via lazy loading and code splitting.
- Integrated RESTful backend APIs for smooth data flow and responsive layouts using Tailwind CSS.
- Maintained high code quality and consistent architecture through active participation in code reviews and feature planning.
- Improved frontend maintainability by building reusable components and enforcing coding best practices.

Restaurant Management System | *React.js, Bootstrap CSS*

- Led development of interactive UI modules for real-time table reservations, order processing, and inventory management.
- Increased booking performance by 20% through lazy loading, code splitting, and memoization.
- Elevated customer experience by automating operational workflows and centralising management tools.
- Drove further performance gains through state management refactoring and code optimisation.

TECHNICAL SKILLS

Languages:	HTML5, CSS3, SASS, JavaScript (ES6+), TypeScript
Frameworks:	React.js, Next.js, Vue.js, Vite, Bootstrap CSS, Tailwind CSS
State Management:	Redux, Redux Toolkit, Vuex
Testing:	Jest, React Testing Library, Vue Testing Library, Vitest
Tooling:	Webpack, Vite, Git, GitHub, GitLab, Figma
APIs/Cloud:	REST APIs, AWS S3, Google Vision API, LINE Messaging API

EDUCATION

Bachelor of Technology in Computer Science & Engineering

APJ Abdul Kalam Technological University | CGPA: 7.0 | 2016 – 2020
